AN OPEN LETTER: CITYWIDE GEODEDIC CONTROL, RECORD OF SURVEY 23731

Design Professionals, Contractors, and Developers,

The City sets, establishes and maintains various survey control monuments in and around the City limits. On November 5, 2020 the City completed its efforts to put in place a new set of survey control monuments and filed with the County of San Diego as Record of Survey 23731. This effort was completed in order to ensure ongoing high quality survey control for the residents and design professionals.

Effective on January 1, 2021 any new project submitted to the City must be based on one of the controls provided in Record of Survey 23731. Projects without approval by July 1, 2021, regardless of initial submittal date must update the project's survey control.

Matt Little, P.E.
City Engineer / Deputy City Manager
